

Example (con't)

```
#!/bin/bash
# _containment_

clear
set -e
trap 'catch' ERR

catch () {
    echo '*** FATAL ERROR ***'
    exit 1
}

# _details_
script1 () {
    echo hello
    echo world
    echo from script 1
}

script2 () {
    echo hello
    echo world
    echo from script 2
}

script3 () {
    echo hello
    echo world
    echo from script 3
}

# _fb pipeline_
script1
script2
script3
```

Example (con't)

```
script1  
script2  
script3
```

- The most “important” lines are the last 3 lines.
- Until you understand the last 3 lines, the rest is noise
- Desired: Elide noise using .md eliding editors
