

How - Step 1

```
{_containment_  
  
  {_fb pipeline_  
    allContains1  
    printAllDeepContains  
    printAllDirectContains  
  
  }  
  {_details_  
    {allContains1  
      load fb  
      load onSameDiagram  
      load contain1  
    }  
    {printAllDeepContains  
      load fb  
      load onSameDiagram  
      load contains2  
    }  
    {printAllDirectContains  
      load fb  
      load onSameDiagram  
      load contains3  
    }  
  }  
}
```

- Convert to structured syntax

How - Step 1 (con't)

- Use PEG (or any language) to perform conversion from #-syntax to { ... } syntax
- Github: <https://github.com/guitarvydas/md2brace>
