

Outlook Determines Workflow

- How do you write software if you are convinced that it will work the first time?
- How do you write software if you are convinced that it will fail?

FDD vs Regular Design

- FDD
 - How to build-in easy recovery from changes (failures)
 - meta-design
- Regular Design
 - How to build it so that it works first time, ignoring possibility of changes / failure
 - A to B design, straight ahead
