Wish List - PEG + Semantics

- Wouldn't it be nice if Grammar and Action Specs could appear in the same file?

- Create a PEG to generate PEG

- Use SH (Bash, zsh, etc.) to automate gluing code together for final result

-

Asides

- "include" is just an edit command (not needed by paradigm / language)

- M4 macro processor can perform including

- "include" should be part of the IDE, not a language feature

- Q: what else is just edit commands? (OO?)
