Glue Tool Syntax

- semantic spec is *name [parameters] = {{ preamble }} [[output-spec]]*

- most *Glue* specs contain only [[…]] output specs (preamble is less often used)

Glue Tool Syntax

- *name* is an id (the usual stuff [A-Za-z_][A-Za-z0-9_]*

- each *glue* rule must correspond (name + parameters) with each grammar rule

- no need to do "type checking" — Ohm-JS raises errors if specification is wrong or incomplete
