# Notation - Example

Solving My Accounting Problem
Paul Tarvydas, April 2021

# My SCN

- Create a notation for my problem

- Need to capture account, statement & year with as little human repetition as possible

  - fiscal year starts in August (not January), hence, FY (Fiscal Year) straddles 2 calendar years

- Use PEG for top-down

- Use ASON for bottom-up

- Meet somewhere in the middle

- Goal - implement in a few hours (not days, weeks, years)
