DI

- Other DIers may choose to solve the problem differently

  - depending on their own set of knowns

- DI means Design Intent

- <u>It Is The Architect's Responsibility To Make A Design Clear To The Reader</u>

Top and Bottom

- The "top" is my data

- The "bottom" is ASON

- I don't yet know what the middle is, but it will come as I proceed

  - Q: Is this just accumulated experience?

  - A: Yes, the *belief (knowledge, reliance upon)* is experience-based. It has happened many times. I know that I can rely on being able to solve a problem by deferring the problem and "not forcing" a solution.
