Glue Tool

- Transpiler that generates *semantic* code for Ohm-JS from simplified specs

- Separate from Ohm-JS

- Need to manually bolt Ohm-JS grammar and JS semantics code into a final JS program that forms the app

- Glue tool generates the JS semantics code, but programmers must copy/paste it into the final JS app

Wish List - PEG + Semantics

- Wouldn't it be nice if Grammar and Action Specs could appear in the same file?

- Create a PEG to generate PEG

- Use SH (Bash, zsh, etc.) to automate gluing code together for final result

-
